Understanding the Problem

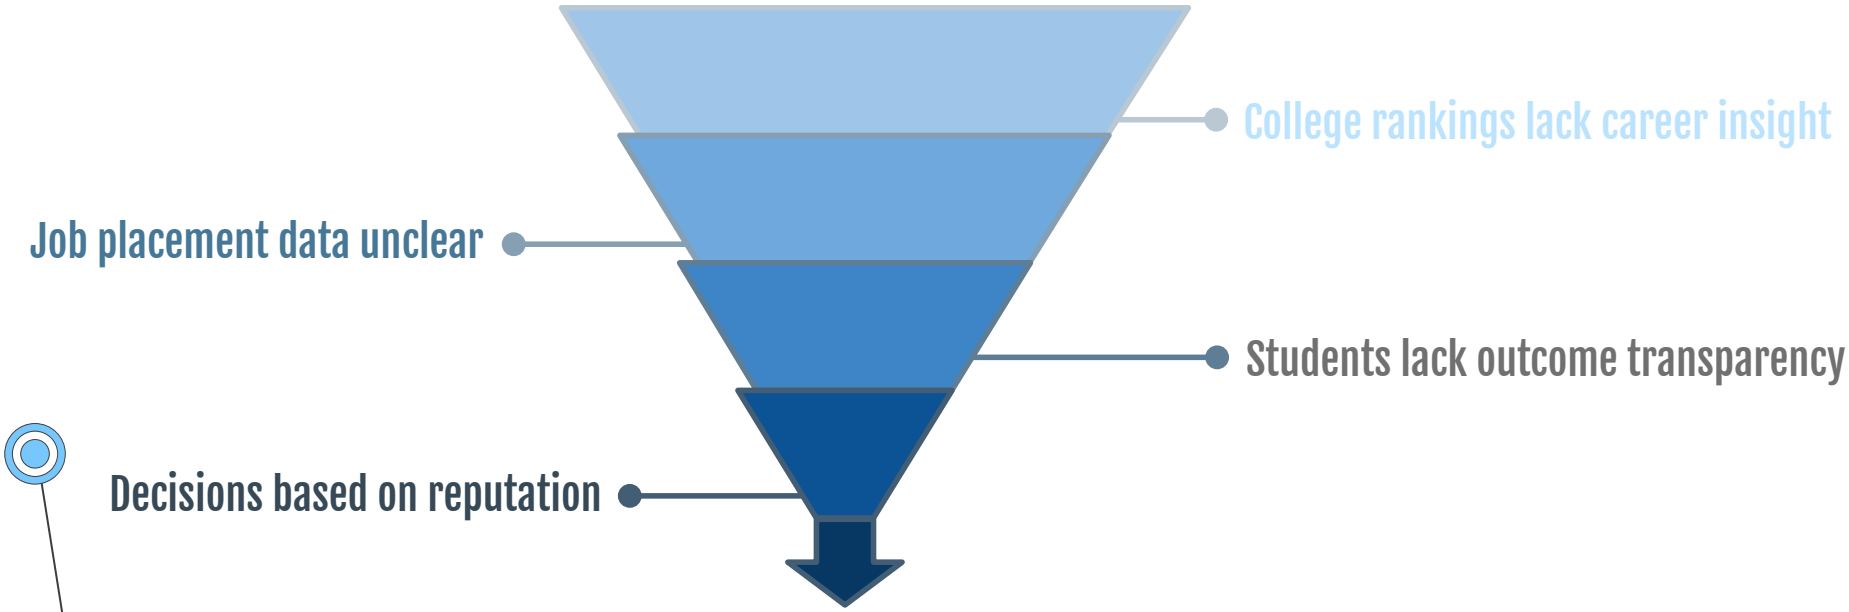

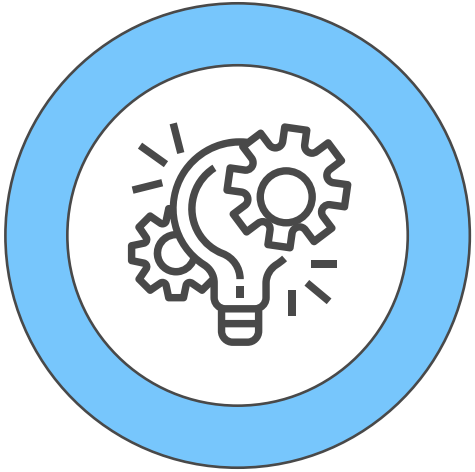

PROBLEM

PipeLine

Solution

What is PipeLine?

Career Goal

Majors

Internships

College Options

Student Organizations

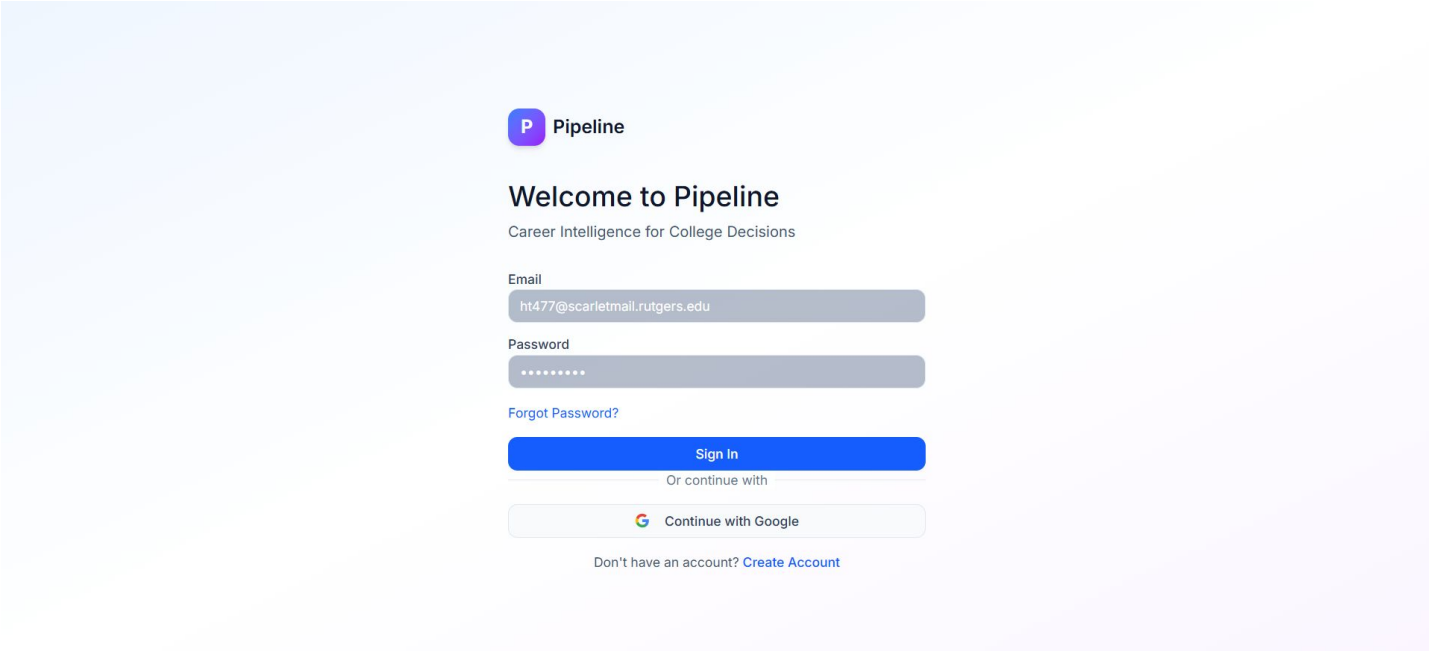

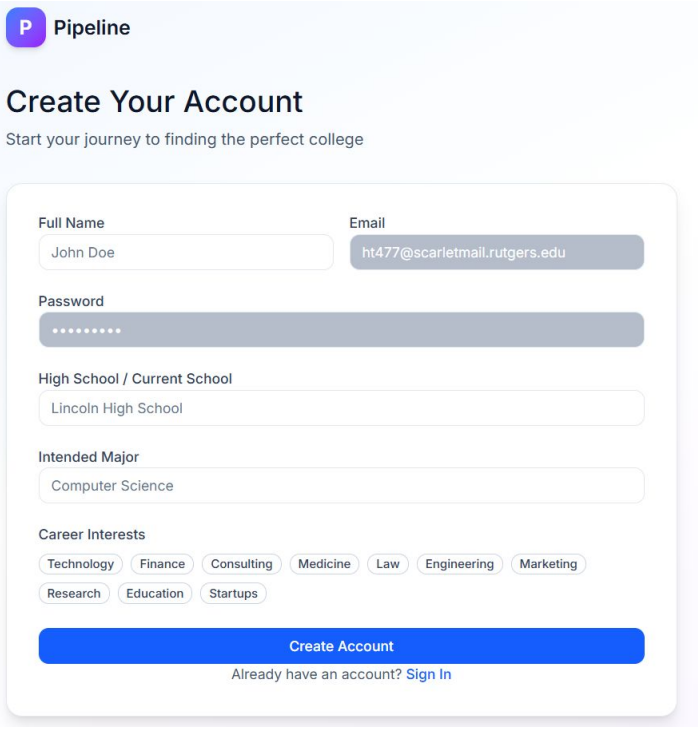

Full Time Job

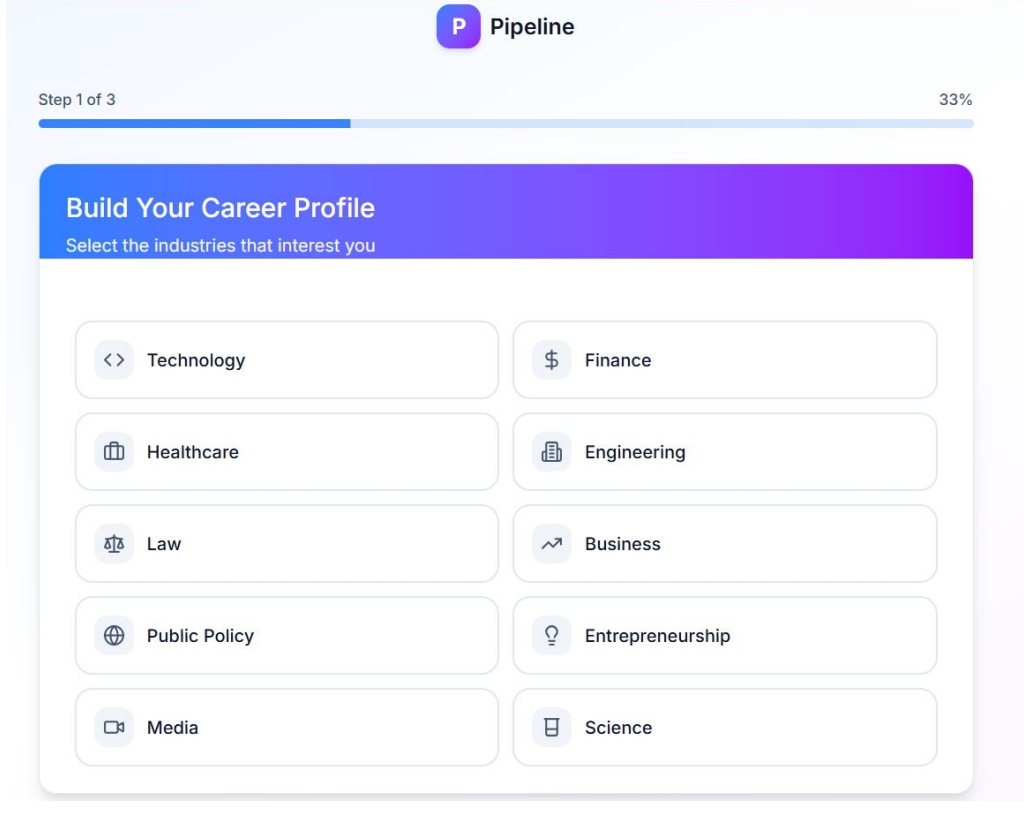

Our Key Features

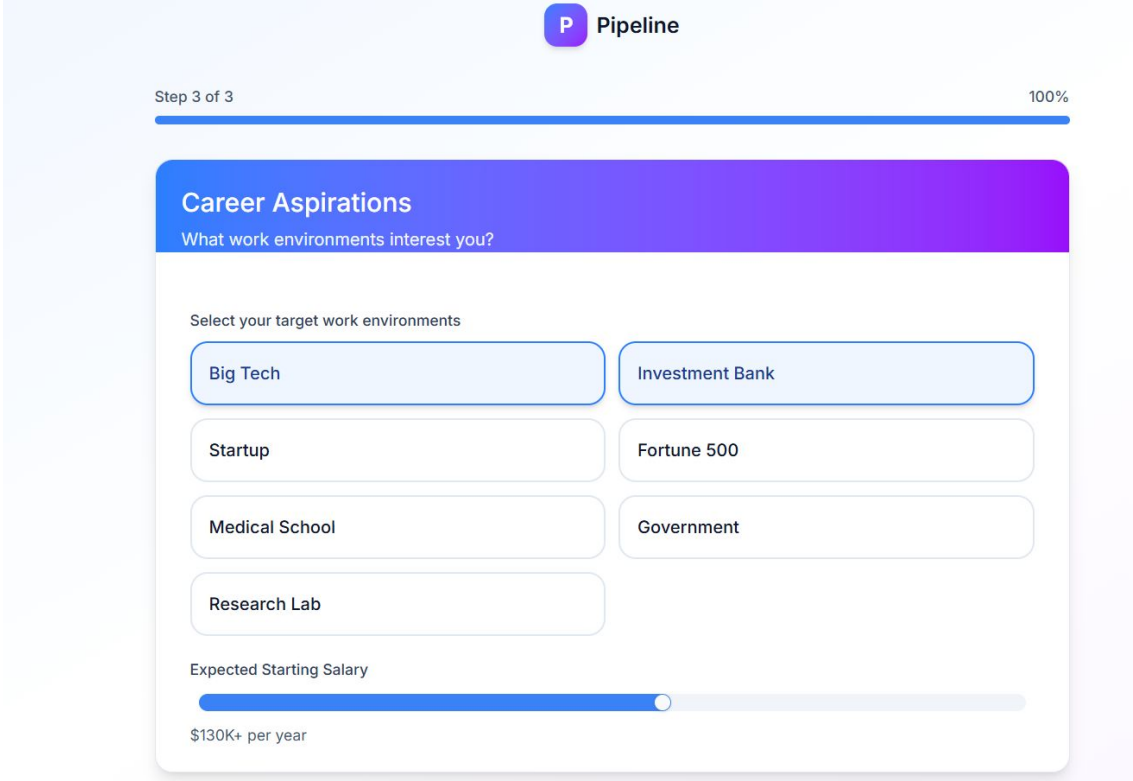

1. Comparison of Schools
2. AI Career Advisor
3. Data Insights
4. Specific Insights (Clubs, Internships, Opportunities through each university)
5. Top Employers of each school

Data Points

Impact

Data-driven college decisions

- Based on real career outcomes

Transparency in higher education

Costly misaligned college decisions + potential unemployment

Sustainability

Freemium revenue model

Scalable cloud platform

Network effects from growing data

Future expansion into workforce analytics

Market Opportunity

Target Market

- 3.5 Million U.S high school graduates each year
- Transfer Students
- International Applicants

Market Size

- 700 Billion spent annually on higher education decisions
- Tuition, housing, books, fees

Market Expansion

- Phase 1: Career Intelligence Platform
- Phase 2: Career Planning Platforms
- Phase 3: Recruiting Analytics For Employers

Future Plans

Backend Integration with Verified Data

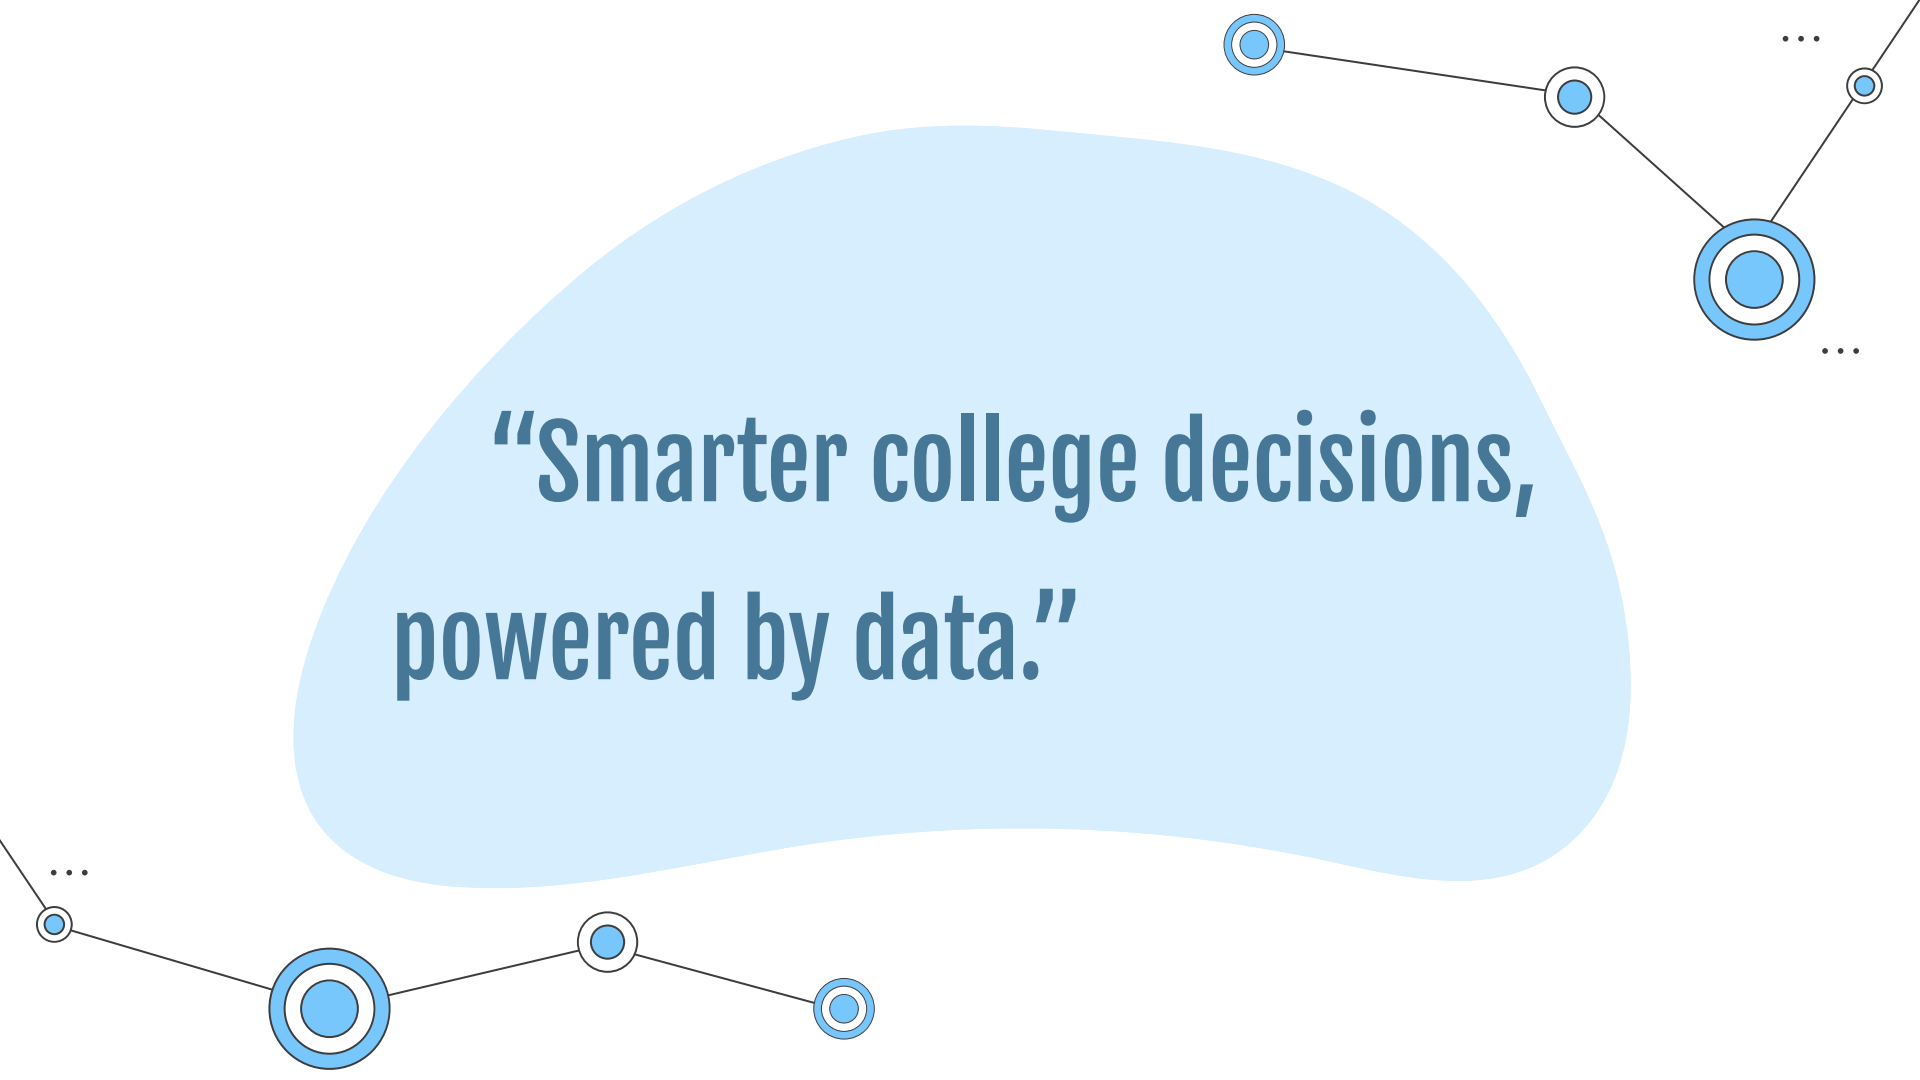

Partner with career outcome data providers to build accurate industry pipeline scores (university-published employment reports, aggregated alumni employment data, institutional common set data releases), API + databases

Potential Partnerships

Integrated Postsecondary Education Data System, Linkedin, College ScoreBoard, Handshake, OpenAI, Anthropic, links to internships

Accurate Statistics

Acceptance rates, SAT/ACT ranges, Graduation rates, Median earnings after graduation

“Smarter college decisions,
powered by data.”
